SKILLS

Languages/Frameworks — HTML | CSS/Sass | JavaScript | React | JSON

Testing — Cypress | Mocha/Chai

Tech/Tools — GitHub/Git | Typescript | Postman | Vercel | Redux | CI/CD | Express

Concepts — Agile Development | Object Oriented Programming | RESTful API

SOFTWARE PROJECT

L'ÉVies || [Repository](#) || 3-member group 40 hours

An app that displays different charging stations based on input value for EV drivers. It allows users to add/modify selected stations as part of their trip itinerary.

- Self-taught and asynchronous learning to implement TypeScript into React framework to debug and maintain a type-safe code.
- Self-formulated idea based on research sourced public API and intended EV users..
- collaborated effectively with the team through the utilization of daily stand-ups, retrospectives, Miro wireframes, GitHub Projects, and Google Calendar, resulting in well-organized work processes, seamless remote communication, and efficient coordination of asynchronous workflows.
- Technologies Used: Postman, React, Visual Code, TypeScript, Sass/CSS, Cypress, Vercel.

Putrescent Potato || [Repository](#) || 2-member pair 40 hours

React application for movie-watchers to view movie details based on movie titles provided in the input form.

- Developed comprehensive end-to-end (E2E) test packages utilizing Cypress.io.
- Implemented React PropTypes to ensure validation of data derived from written code
- Technologies Used: Postman, React, Visual Code, PropTypes, CSS, Cypress, Vercel.

EXPERIENCE

Art Teacher - Elected Team Lead | Santa Fe Public Schools | Santa Fe, NM SY 2017-2022

- Digital and technical organization through digital and technology literacy.
- Create visual presentations for at-home learning and instructions.
