Profile

I'm very interested in working as a front-end developer. My enthusiasm for learning motivates me to actively gain the skills required for this position. I'm a fast learner, I can pick up the basic concepts of programing languages or technologies quickly as well as apply it to the project efficiently. I enjoy working with others, sharing ideas and helping each other achieve the goals.

RELEVENT COURSES

PROGRAM DESIGN AND DEVELOPMENT (SPRING 2023)

Described software design decisions logically using valid references, figures, and UML. Built a large project effectively using version control, code reviews, project management, documentation, and software testing.

PRACTICE OF DATABASE SYSTEM (FALL 2023)

Developed basic concepts and elements of database management, database design methodology, storage, indexing, query, evaluation, and transaction management as well as built application on top of the major open-source PostgreSQL.

INTERNET PROGRAMMING (FALL 2023)

Built a website using a varied collection of technologies, both with "font-end" technologies (HTML, CSS, Javascript, DOM Programming) and convention of web APIs. Utilized HTTP protocol and "back-end" technologies, like web-server programming using node.js, database interaction using SQL, templating languages, and data transport languages such as XML and JSON to accomplish assigned tasks.
